SUMMARY

Passionate Java Developer with 3 years of experience. I am currently continuing to expand my knowledge as a Systems Bachelor's student and also as a self-taught person, while I am open to positions as a Back-end Java Developer, for which I consider myself qualified. Two of my goals are to grow personally and professionally, while meeting and even exceeding the expectations of the company and the client.

PROJECTS

My New Adventure

github.com/villalbacarolina/My-New-Adventure-Back-End • Jul 2024 – Present

- Social media for discovering events and places of interest, with the possibility of interacting safely between users. Developed individually in English using Java, Spring Boot, Hibernate, Gradle, PostgreSQL, Git, Postman, HTML, CSS, Bootstrap and React. I participated in all stages of the project: from the conception of the idea, design, planning, to implementation, refactoring and troubleshooting.

Diseñando Regiones

github.com/villalbacarolina/Dise-ando-Regiones • Jul 2024 – Jul 2024

- We created a program as a team where you can select provinces and write the similarity between them. We used UML, Git, Java, JUnit, Design Patterns and Swing. Good communication and organization was achieved among the team, achieving the highest grade.

Portfolio

carolina-angeles.web.app • Oct 2022 – May 2022

- This is not my current portfolio but the first one I created. Despite the challenge of creating my first complex project with newly learned technologies, I managed to submit it on time and get it approved thanks to team collaboration, my resilience and problem solving. I fulfilled the role of a full stack developer using UML, Java, Spring Boot, Hibernate, MySQL, Maven, Git, HTML, CSS, Bootstrap, Postman and Angular.
